

BOLT Scaffolding

COMMERCIAL RESIDENTIAL INDUSTRIAL

SCAFFOLDING

Bolt Scaffolding provides scaffold access to residential, commercial and industrial sectors of the construction industry. Bolt Scaffolding is BAS Approved for works with Qld State Government and holds Ergon/Energex Approved Persons status.

Our teams of High Risk Work Licenced scaffolders erect AS/NZS compliant scaffolding across all sites in SE Qld.

Using the adaptable “tube & coupler” scaffolding, Bolt Scaffolding endeavour to minimize the use of mechanical fixings where practicable, within AS/NZ Standards, limiting damage to the building, and is fully adaptable to site conditions, where system scaffolding cannot be erected. A combination of scaffolding and roof edge protection can be erected as per site requirements.

Bolt Scaffolding are experienced in insurance repair work and provide handover certificates and completion pictures for every job.

Capabilities

Scaffolding

Our experience with both system and “tube & coupler” scaffold enables us the versatility to provide clients with scaffolding that truly meets their site safe access needs.

We provide fully designed, AS/NZS code compliant scaffold access including, but not limited to:

- Independent scaffolds & mobile access towers
- Pedestrian bridges & walkways
- Lifting frames & support scaffolds
- Temporary roofs & buildings
- Cantilever & truss-out scaffolds
- Hung & suspended scaffolds.
- Loading bays

Asbestos & Encapsulation

To support your WHS requirements when working with asbestos materials, Bolt Scaffolding can provide fully or partially encapsulated scaffold and roof edge protection, depending on site and safety requirements. Scaffold design can incorporate your encapsulation requirements.

Design & Engineering

We have the knowledge and ability to design any project with any system to suit your access needs, including;

- 2D / 3D design
- Animation
- VR Technology

Training

Bolt Scaffolding are committed to training our staff in all aspects of the scaffolding industry. We employ Cert III Scaffolding trainees, and have an ingrained belief in continuous improvement. Training matrixes available as required and on request.
